

## 2.1 State and Regional Involvement—TYPE II

### Applicable Levels

LI, LII, LIII, PTCI, PTCII

### Definition and Requirements

All trauma centers must participate in the regional and/or statewide trauma system.

### Additional Information

Examples of participation may include the following:

- Participation in state and regional trauma advisory committees
- Leadership in state and regional medical audit committees
- Collaboration with regional trauma advisory committees, EMS, or other agencies to promote the development of state and regional systems
- Participation in media and legislative education to promote and develop trauma systems
- Participation in state and regional trauma needs assessment or injury surveillance
- Participation in the development of a state or regional trauma plan or state trauma registry
- Provision of technical assistance and education to hospitals and their providers within the region to improve system performance

### Measures of Compliance

Written documentation that demonstrates participation, such as meeting agendas
